TO: Resource Recovery File

FROM: Peter Evers, Environmental Chemist

SUBJ: Contact Report - Larry Dietrich
Pasco Sanitary Landfill

TDD 10-8408-2A

I spoke with Larry at about 9:15 this morning. I was in need of information on the waste generators. He said:

- * Barium sludge (chloro-alkali wastes) came from Weyerhaeuser's chloro-alkali plant in Longview, WA.
- * 2,4-D wastes came from Rhone Poulenc in Portland, Oregon.

He said more information is available from Resource Recovery Corporation in Seattle (206) 767-0355. He suggested that I speak with Ron West, Gary Berminsola or Mr. Matingly.

He also clarified a point about owner-operator-manager relationships between himself and Resource Recovery. He said the land was leased to Resource Recovery by his father, and they operated the site. He was employed as the manager of the facility.
